### *A Special Pain Relief Report*

Let's talk about PAIN!

Pain is defined as a physical suffering or distress, as due to injury, illness, etc. or a distressing sensation in a particular part of the body.

As you know pain does not only have to be neck or back pain. Pain can be present anywhere from the top of your head to the tip of your big toe.

According to US Dept. of Health & Human Services pain affects more American than diabetes, heart disease and cancer combined. One in every four Americans, have suffered from pain that lasts longer than 24 hours.

20 % of the American adult population lives with chronic pain and 20 million American adults live with pain that limits life or work activities on most or everyday for the last six months.

There are so many different types of pain - chronic pain, acute pain, neuropathic pain, pain associated with a disease or sickness, pain brought on by some sort of physical injury, and more. Actually, there are too many "pains" to list.

Most commonly dealt with among adults are musculoskeletal pain, back pain, neck pain, migraine or headache pain and knee pain.

**I think you get the point and I tell you all of this to say:  
*I SEE YOU! I HEAR YOU!***

**I know pain is real and I know it is affecting your daily life.**

Pain is a problem, a solution for pain is needed, and why up to this point has nothing worked for your pain?

Are you in pain and not able to go about your daily activities with ease?

Are you ready to be able to walk, stand, climb, run, play, jump with no pain?

Up to this point finding the actual cause of your pain has not been found and you are still doing life in pain.

**The pain is causing you to suffer and lose bits of joy....**

**Often people with pain are treated as if it "over exaggerated".**

People who do not suffer from pain have a hard time really understanding how the pain is affecting your body. You may find people who roll their eyes and just tell you to deal with it and what they don't understand is that you are dealing with it the best that you know how.

**Many feel isolated. Especially if a reason for the pain cannot be found.**  
When pain is present in the body it can keep you from doing the things that you love. Maybe you have kids or grandkids and you don't get to go play with them. Instead you get to sit and watch while everyone else is laughing and have a good time. Or when was the last time you were invited to an event and you had to say no because you knew it was going to cause you to be in too much pain. Pain can be lonely.

**Sleep patterns are interrupted which leads to lack of sleep.**  
How about sleep? If you are in pain it is hard to find a good position to sleep. Not being able to find comfort while lying in bed causes you to toss and turn which ultimately affects your sleep. No sleep means that each morning comes and you have less energy to tackle the day.

**I've seen people go from  
extreme chronic pain  
to pain free in my office.**

I've been in practice for 10 years as a Doctor of Chiropractic and I feel like we are getting really great results with new technology....

Your solution is here and the results are amazing. All this pain and suffering you have been through, and now....

**I am on a mission to help  
others just like you!**

## I'm Dr. Stephen Vincent, DC

Many also know me as "Dr. Gunney".

Gunney is a nickname that my dad gave me when I was little and it's the name that stuck. It's easy and catchy...so that's what I go by.

As I told you before I have been in practice for 10 years. I started out just like many others coming right out of college. I had your typical chiropractic office treating the everyday neck and back pains.

There were times I felt like I wasn't fully helping my patients because they were constantly coming back with the exact same pain. I was doing everything that I was trained to do and still I felt like there was something not right.

All these traditional methods we were working, but not to the full potential that I wanted it too. I knew there was more I could offer my patients to help them continue to get better and hopefully eventually get out of pain.

So, I went on a journey. A journey that has taken me 10 years and counting. I am addicted to learning now just so I can help others like you. I spent hours taking extra classes, attending specific trainings and I am trained by the best of the best.

Through all of this I was introduced to a doctor from Switzerland who was passionate about health and passionate about helping others. He taught me and trained me on several pain techniques and I was introduced to state of the art technology designed to get people out of pain.

## Let me introduce you to Stephanie. Here is what she has to say about her experience and her journey through pain relief.

"This is a great place! It's very peaceful when you walk in and very friendly. I have had an excellent experience with Dr Gunney and his staff. Not only with general chiropractic care but with other things as well.

I had 'tennis elbow' and had lost all grip strength in my right hand. He fixed it and I didn't need surgery!

I also had 'trigger finger' in my left hand and had a lot of pain and stiffness. They're currently working on it now. With only occasional, minor stiffness, it's fully functional again with no pain.

I am also doing the weight loss plan. I've been on it for 9 weeks so far and I've lost 37lbs.

So, check it out! You won't be disappointed!"

**Will you do me a favor? I want you to....**

***Imagine What Life Would Be Like If You Could Be Pain Free***

You move easily with no pain, you can climb the stairs at work, you can get out of a chair without struggle, those knees aren't creaking and don't hurt, your hands don't ache, the shoulder has it's range of motion back, your posture is better and you can sit up straight, it's been weeks since you have had any kind of headache, and get this.....you sleep good and get a full nights rest.

**theamarillochiropractor.com | 806.356.1362**

© 2019 - Stephen Vincent, DC

That full nights rest now leads you to more energy and ultimately you find joy in your days again.

Does it even seem possible for someone to feel this good again after being in pain for so long. Well, you may not get everything back 100%, but if you could get most of it back wouldn't it be worth your time, effort and money?

Of course it would.

*What if you could get in and out of the floor to play with your kids or grandkids, you can work outside in the yard and garden again? What if you get to say YES to that next event you are invited to because you know you can walk further than you could before?*

**Do you have a smile on your face? I can see it :)**

Once we find out if you qualify for this technology in our office I know things in your life are going to get easier, lighter, happier and better.

How would you like....  
A FREE No Obligation Consultation & Exam!!!!

# A Special Offer Just For You!

*Here is what's included:*

## **Consultation:**

You will meet one on one with one of our doctors and discuss in detail the problems you are dealing with. We will make sure we have thorough knowledge of your history so help us determine the cause.

## **Exam:**

An Exam with diagnostic tests will be given to determine underlying issues.

## **X-Ray:**

X-Ray will be taken in order for the doctor to be able to see exactly what is going on in your body. This is the best tool for us to determine if we can help.

## **Report of Findings:**

This is where you will find out if the services we offer for pain are right for you. We will discuss the problem, how we can fix it and how much it will cost.

**Because you downloaded this FREE Report  
you get a super cool bonus!**

## **BONUS:**

*Free First Technology Treatment – after the initial consultation and exam you will receive a free treatment that day with the technology that the doctor feels will work best in your case.*
